

Contains more than one type of atom, chemically joined together	
---	--

Oxygen (O ₂)		Contains different types of atoms, elements or compounds not all chemically joined	
-----------------------------	--	--	--

N ₂ (nitrogen)	
------------------------------	--

H ₂ O (water)		Salt and water	
-----------------------------	--	----------------	--

Contains only one type of atom	
--------------------------------	--

CO ₂ (carbon dioxide)		Sand and sugar	
-------------------------------------	--	----------------	--
